# Medicinally important plants of Jalgaon Taluka (Maharashtra)

Firdos S. Shaikh\*

Department of Botany, Iqra's H J Thim college of Art's and Science Mehrun, Jalgaon (M.S.), India

**ABSTRACT:** The present paper deals with study of medicinal plants of Jalgaon Taluka in Maharashtra.**Key words:** Medicinal plants, Jalgaon, Diseases

## Introduction

Studies on medicinal plants of Jalgaon Taluka are very meager despite of its rich traditional medical practices. As systematic account on medicinal plant of west khandesh has been carried out by Karnik (1966), Salunkhe (1995), Yadav and Patil (2001) and Patil (2002) as studies medicinal plants.

Jalgaon city is rich in traditional of medicinal plants home to home survey and its surrounding areas reveals interesting information which is encouraging substantial to study on this account. Hence the survey and analyze the potential at what level the herbal medicines are being used the present study has been undertaken. Due to great interest of people of Jalgaon, Iqra's Unani medical College who have started Unani hospital and research center where plantation of medicinal plants as well as research on medicinal plants is extensively undertaken. People utilized traditional herbs because of most of the people believed on Ayurveda and Unani medicines. Since they do not have side effects.

There are many plants species used as herbal medicines all over the world. Therefore now, studies on medicinal plants have become a focal point of studies of many botanists.

## About the study area

Jalgaon is located at 21.01N 75.10E. It has average elevation of 299 mts. above sea level. Jalgaon is in eastern Khandesh of North Maharashtra state. Jalgaon is main centre of collection and distribution of Agricultural products.

**Soil:** Soil is alluvial on the banks of river, elsewhere it is black also saline soil in cultivated areas and around the banks of river. There is

variation in soil composition from dark brown to red blackish grey to maroon soil.

**Climate:** The climate is dry except monsoon. The average rainy days are 45-60

**Temperature :** December to January are coldest months of the year with the mean daily minimum temperature 8.2°C and the mean daily maximum temperature 24 °C cold waves from northern India may also affect the temperature of the area. In summer temperature is about 40 °C to 48 °C.

**Forests:** The forests are mostly man made or dry scrub jungles except few pockets of natural habitat. Many medicinal plants are found in these areas.

## Materials and Methods

Medicinal plants were collected from surrounding areas. The methods of preparation of medicines plant and dosage to be given to the patients were recorded from the medicine men, which are practicing these since long period of time. The various methods are paste, powder, decoction, cold infusion juice and extract pills oils etc.

## Results and Discussion

It is clear from table 1 that many plants and even parts are used to cure single disease cure or multiple diseases. Whole plant or its parts is used as medicine. Plants parts used for preparation of medicines are mostly root, stem, leaf, rhizome, flower and fruits. Mode of administration is also interesting and it can be seen that common methods of administration is oral followed by external and internal application. The dosage is in the form of decoction infusion, extract, powder, pills and oils. The commonly used home remedies are for cold, cough, asthma and bronchitis, body pains, fevers and pneumonia, stomach ache etc.

Table 1. Medicinally Important Plants of Jalgaon Taluka (Maharashtra)

Sr No	Name of Plant	Family	Common Name	Plant part used	Name of Diseases	Mode of Administration
1	<i>Acalypha indica</i> L.	Euphorbiaceae	Kokhali	Leaf	Clod and Cough	Oral, decoction
2	<i>Bauhinia racemosa</i> L.	Cesalpiniaceae	Apta	Bark	Clod and Cough	Oral infusion
3	<i>Euphorbia hirta</i> Roxb.	Euphorbiaceae	Chotti dudhi	Whole Plant	Clod and Cough	Oral, decoction
4	<i>Ocimum basilicum</i> L.	Labiatae	Sabja	Leaf	Clod and Cough	Oral, decoction
5	<i>Ocimum gratissimum</i> L.	Labiatae	Tulsi	Leaf	Clod and Cough	Oral, decoction
6	<i>Psidium guajava</i> L.	Myrtaceae	Jamphal	Leaf	Clod and Cough	Oral, decoction
7	<i>Acacia leucophloea</i> (Roxb.) Willd sp	Mimosaceae	hirar	Bark	Body pain	External used as paste
8	<i>Aloe vera</i> L.	Liliaceae	Korphad	Leaf	Body pain	External used as paste
9	<i>Calotropis procera</i> (Ait) R. Br.	Asclepiadaceae	Rohimsdar	Latex	Body pain	External used as paste
10	<i>Eucalyptus camaduensis</i> Dehun	Myrtaceae	Nilgiri	Leaf	Body pain	External used as paste
11	<i>Hibiscus cannabinus</i> L.	Malvaceae	Ambadi	Whole	Body pain	External used as paste
12	<i>Argemone mexicana</i> L.	Papaveraceae	Pila Dhotra	Root	Stomach ache	Oral decoction
13	<i>Aegle marmelos</i> L. Carr	Rutaceae	Bel	Fruit	Stomach ache	Oral decoction
14	<i>Azadirachta indica</i> A Jass	Meliaceae	Neem	Leaf	Stomach ache	Oral infusion
15	<i>Calotropis gigantea</i> (L.) R. Br.	Asclepiadaceae	Rohimsdar	Root	Stomach ache	Oral decoction
16	<i>Ficus religiosa</i> L.	Moraceae	Pipal	Bark	Stomach ache	Oral decoction
17	<i>Lantana camara</i> L. <i>veraculeata</i> (L.) Mold	Verbenaceae	Ghaneri	Leaf	Stomach ache	Oral decoction
18	<i>Tectona grandis</i> L. f.	Verbenaceae	Sag	Leaf	Stomach ache	Oral decoction

19	<i>Ricinus communis</i> L.	Euphorbiaceae	Erandi	Leaf	Jaundice	Oral decoction
20	<i>Tinospora cordifolia</i> Willd. mrs. ex. Kh and Th	Menispermaceae	Gulvel	Root	Jaundice	Oral decoction
	<i>Terminalia arjuna</i> (Roxb. Ex. C.) W and A	Combretaceae	Behda	Bark	Jaundice	Oral decoction
21	<i>Terminalia bellirica</i> (Gaeth) Roxb.	Combretaceae	Behda	Bark	Jaundice	Oral decoction
22	<i>Vigna radiates</i> (L.) Willezek	Fabaceae	Adad vel	Whole plant	Jaundice	Oral decoction
23	<i>Asparagus Racemosus</i> Willd Var. javanicus (Kunth) Baker	Liliaceae	Shatavari	Whole plant	Eyes	Ext. Paste
24	<i>Butea monosperma</i> (Lam) Taub.	Fabaceae	Palas	leaf	Eyes	Ext. Paste
25	<i>Brassica juncea</i> (L.) Czern. and coss	Brassicaceae	Mohri	Whole plant	Dysentery	Oral Decoction
26	<i>Croton banplandianus</i> Baill	Euphorbiaceae	Croton	Bark and root	Dysentery	Oral Decoction
27	<i>Evolvulus alsinoides</i> L. f.	Convolvulaceae	Vishnu Kanti	Whole plant	Dysentery	Ext. paste
28	<i>Madhuca longifolia</i> (Koen) Mac. Bride	Sapotaceae	Mahu	Bark	Dysentery	Oral infusion
29	<i>Tectona grandis</i> L. f.	Verbenaceae	Sag	seed	Dysentery	Oral decoction
30	<i>Aloe vera</i> L.	Liliaceae	Karphad	leaf	Boils	Oral decoction
31	<i>Azadirachta indica</i> A. Juss	Meliaceae	Neem	Bark	Boils	Oral decoction
32	<i>Cassia auriculata</i> L.	Cesalpiniaceae	Avali	Root	Diabetes	Oral decoction
33	<i>Catharanthus Pussilus</i> Mar G Don	Apocynaceae	Sadafuli	Flower	Diabetes	Oral decoction
34	<i>Syzygium Cumini</i> Skeels	Myrtaceae	Jamphal	Fruit	Diabetes	Oral decoction
35	<i>Lagaceae Mollis</i> Car	Compositae	Boal	Leaf	Diarrhoea	Oral decoction
36	<i>Tectona grandis</i> L. f.	Verbenaceae	Sag	Seed	Diarrhoea	Oral decoction
37	<i>Vigna radiata</i> L. wilbak	Fabaceae	Adadvel	Root	Diarrhoea	Oral decoction
38	<i>Calotropis glangtia</i> (L.) R Br	Asclepiaceae	Rohimsdar	Latex	Wounds	Ext. Paste
39	<i>Calotropis procera</i>	Asclepiaceae	Rohimsdar	Latex	Wounds	Ext. Paste
40	<i>Cordia dichotoma</i> forst f	Euphorbiaceae	Bhokar	Seed	Wounds	Oral decoction
41	<i>Mirabilis jalapa</i> L.	Nyctaginaceae	Gulbakhshi	Fruit	Wounds	Ext. Paste
42	<i>Psidium guvava</i> L.	Myrtaceae	Jamphal	Leaf	Wounds	Oral decoction
43	<i>Cydon dactylon</i> L. Pers	Poaceae	Durva	Whole plant	Fever	Ext Paste
44	<i>Cassia fistula</i> L.	Cesal Pinniaceae	Amaltas	Fruit	Fever	Oral decoction
45	<i>Solanum virginianum</i> L.	Solanaceae	Piludi	Whole plant	Fever	Oral decoction
